Regionally Important Networks

A subtask of the MTP Update

March 25, 2020
Shauna Harshman, Associate Transportation Planner III

TTC
Page 10
What we are working on

- Developing maps and graphics to increase program & project funding
- Creating tools to assist decision making
- Building tools for consistency check between local and regional plans
Where we are headed

A planning process that:

• increases proactive planning;

• improves transparency;

• shifts focus from individual projects to the regional system;

• provides a clear framework for the definition of projects; and

• is inclusive of all users.
Map insert of regional transit priority networks.
Next Steps

• Discuss network approach and graphics with TTC

• Complete map updates of regionally important networks
