

Request for Clarifications: Question & Answer

April 16, 2024 | Request for Qualifications – Website Redesign and Update

SPOKANE REGIONAL TRANSPORTATION COUNCIL

Spokane, WA

Question:

“Looking at the contract, this project is capped at \$30k, correct? And it's probably going to be mostly focused on WordPress or a similar CMS?”

Answer:

The project expenditure cap approved by the SRTC Board of Directors is \$30,000, however, the scope of services associated with the project is negotiable. As the experts in website development, SRTC will seek the selected consultant’s opinion on the appropriate tasks and services required for the best website update within the organization’s needs and budget. As seen in the evaluation criteria, SRTC prioritizes the expertise, past work and skill set of potential consultants. SRTC recognizes that demonstrated strength in these areas will indicate a consultant who can give an expert opinion on the appropriate amount of work to complete for this project.

Additionally, in the RFQ SRTC outlined that while the website is currently on WordPress, the organization is open to moving it to a different site if the consultant believes it will be a better fit for the organization. As stated above, SRTC is seeking a consultant team to provide their expert opinion to inform the decision to continue using WordPress or switch to another platform.
